The International Cyanide Management Code (hereinafter “the Code”, “Code” or “the Cyanide Code”), this document, and other documents or information sources referenced at www.cyanidecode.org are believed to be reliable and were prepared in good faith from information reasonably available to the drafters. However, no guarantee is made as to the accuracy or completeness of any of these other documents or information sources. No guarantee is made in connection with the application of the Code, the additional documents available or the referenced materials to prevent hazards, accidents, incidents, or injury to employees and/or members of the public at any specific site where gold or silver is extracted from ore by the cyanidation process. Compliance with this Code is not intended to and does not replace, contravene or otherwise alter the requirements of any specific national, state or local governmental statutes, laws, regulations, ordinances, or other requirements regarding the matters included herein. Compliance with this Code is entirely voluntary and is neither intended nor does it create, establish, or recognize any legally enforceable obligations or rights on the part of its signatories, supporters or any other parties.
MINING OPERATIONS SUMMARY AUDIT REPORT
TEMPLATE

Introduction

This document provides the framework for the information that an auditor must include in the Summary Audit Report prepared for a Cyanide Code Certification Audit conducted for a mining operation and serves as a general template for presenting the required information.

The International Cyanide Management Institute (“ICMI” or “the Institute”) reviews the Summary Audit Report to ensure that it accurately represents the results of the Detailed Audit Findings Report and includes sufficient information to demonstrate the basis for each finding. Once ICMI determines that all documentation required for the Cyanide Code Certification Audit is complete, it posts the Summary Audit Report on the Cyanide Code website.

Instructions

1) The basis for the finding and/or statement of deficiencies for each Standard of Practice should be summarized in the Summary Audit Report. The Summary Audit Report is intended to provide a summary of the information included in the Detailed Audit Findings Report prepared for the certification audit; and therefore, should include only information that is presented in the Detailed Audit Findings Report.

2) The name of the mining operation, the Lead Auditor’s signature, and the submittal date of the final report must be included at the bottom of each page of the Summary Audit Report.

3) An operation that is found in substantial compliance must submit a Corrective Action Plan with the Summary Audit Report.

4) The Summary Audit Report, the Detailed Audit Findings Report, and any necessary Corrective Action Plan with all required signatures must be submitted in electronic format to ICMI within 90 days of completion of the site inspection portion of the audit. An electronic copy of a letter from the owner or authorized representative of the audited operation granting ICMI permission to post the Summary Audit Report and Corrective Action Plan (if one is necessary) on the Cyanide Code website must also be submitted, along with both an electronic copy and a hard copy of a completed Auditor Credentials Form. The Lead Auditor’s signature on the Auditor Credentials Form must be certified by notarization or equivalent. Electronic documents should be submitted to the Institute via email at:

audits@cyanidecode.org

The hard copy of the notarized Auditor Credentials Form should be sent to:

International Cyanide Management Institute
1400 I Street, NW, Suite 550
Washington, DC 20005, USA
MINING OPERATIONS SUMMARY AUDIT REPORT
TEMPLATE

5) The Summary Audit Report should include a description of the operation, identifying the facilities included within the scope of the audit and any new facilities or facilities that have undergone substantial changes since the previous audit (in the case of a recertification audit), and indicating key operational components such as the mine type (e.g., open pit, underground) cyanide forms used such as briquettes or liquid, cyanide packaging and method of delivery and storage, processing methods (e.g., heap leach, milling, carbon-in-leach, Merrill-Crowe), nature and purpose of ponds and impoundments, cyanide destruction circuits, and other site-specific operational features that provide context to the reader ahead of the audit findings. The description of the operation should include sufficient information to describe the scope and complexity of the operation being audited.
Operation General Information

MINING OPERATIONS SUMMARY AUDIT REPORT
TEMPLATE

Auditor’s Finding
This operation is
☐ in full compliance
☐ in substantial compliance *(see below)
☐ not in compliance

with the International Cyanide Management Code.

* The Corrective Action Plan to bring an operation found in substantial compliance into full compliance must be enclosed with this Summary Audit Report. The operation must bring the operation into compliance within one year from the date on which ICMI posts the operation’s Summary Audit Report on the Cyanide Code website.

Compliance Statement
The Summary Audit Report for a recertification audit must include one additional statement that is not required in the Summary Audit Report for an initial certification audit. For an operation found in full compliance with the Code, the report must indicate whether the operation had any compliance issues or significant cyanide incidents since its previous certification and identify where in the report such information can be found. For a mine found in substantial compliance or non-compliance, the report must identify the Standard(s) of Practice on which the finding was based.

One of the following two statements must be included directly following the overall compliance finding for an operation found in full compliance during a recertification audit:

“This operation has not experienced any compliance issues or significant cyanide incidents during the previous three-year audit cycle.”

or

“This operation has experienced compliance issues or significant cyanide incidents or during the previous three-year audit cycle which are discussed in this report under the following Standard(s) of Practice:”

Name of Mine __________________ Signature of Lead Auditor __________________ Date __________________

Page 2 of 14 JUNE 2021
The following statement should be included directly following the overall compliance finding for an operation found in substantial compliance during a recertification audit:

“This operation was found in substantial compliance with the Cyanide Code based on the audit findings discussed in this report under the following Standard(s) of Practice:”

The following statement should be included directly following the overall compliance finding for an operation found in non-compliance during a recertification audit:

“This operation was found in non-compliance with the Cyanide Code based on the audit findings discussed in this report under the following Standard(s) of Practice:”

Auditor Attestation

I attest that I meet the criteria for knowledge, experience and conflict of interest for a Cyanide Code Certification Audit Lead Auditor, as established by the International Cyanide Management Institute and that all members of the audit team meet the applicable criteria established by the International Cyanide Management Institute for Code Auditors.

I attest that this Summary Audit Report accurately describes the findings of the certification audit. I further attest that the certification audit was conducted in a professional manner in accordance with the International Cyanide Management Code Mining Operations Verification Protocol and using standard and accepted practices for health, safety and environmental audits.
Principles and Standards of Practice

Principle 1 | PRODUCTION AND PURCHASE
Encourage responsible cyanide manufacturing by purchasing from manufacturers that operate in a safe and environmentally protective manner.

Standard of Practice 1.1
Purchase cyanide from certified manufacturers employing appropriate practices and procedures to limit exposure of their workforce to cyanide, and to prevent releases of cyanide to the environment.

☐ in full compliance with
☐ in substantial compliance with Standard of Practice 1.1
☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:

Principle 2 | TRANSPORTATION
Protect communities and the environment during cyanide transport.

Standard of Practice 2.1
Require that cyanide is safely managed through the entire transportation and delivery process from the production facility to the mine by use of certified transport with clear lines of responsibility for safety, security, release prevention, training and emergency response.

☐ in full compliance with
☐ in substantial compliance with Standard of Practice 2.1
☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:
Principle 3 | HANDLING AND STORAGE
Protect workers and the environment during cyanide handling and storage.

Standard of Practice 3.1
*Design and construct unloading, storage and mixing facilities consistent with sound, accepted engineering practices, quality control/quality assurance procedures, spill prevention and spill containment measures.*

☐ in full compliance with

The operation is ☐ in substantial compliance with ☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:

Standard of Practice 3.2
*Operate unloading, storage and mixing facilities using inspections, preventive maintenance and contingency plans to prevent or contain releases and control and respond to worker exposures.*

☐ in full compliance with

The operation is ☐ in substantial compliance with ☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:

Principle 4 | OPERATIONS
Manage cyanide process solutions and waste streams to protect human health and the environment.

Standard of Practice 4.1
*Implement management and operating systems designed to protect human health and the environment including contingency planning and inspection and preventive maintenance procedures.*

The operation is ☐ in full compliance with

Summarize the basis for this Finding/Deficiencies Identified:
MINING OPERATIONS SUMMARY AUDIT REPORT
TEMPLATE

☐ in substantial compliance with
☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:

Standard of Practice 4.2
Introduce management and operating systems to minimize cyanide use, thereby limiting concentrations of cyanide in mill tailings.

☐ in full compliance with
The operation is ☐ in substantial compliance with Standard of Practice 4.2
☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:

Standard of Practice 4.3
Implement a comprehensive water management program to protect against unintentional releases.

☐ in full compliance with
The operation is ☐ in substantial compliance with Standard of Practice 4.3
☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:

Standard of Practice 4.4
Implement measures to protect birds, other wildlife and livestock from adverse effects of cyanide process solutions.

☐ in full compliance with
The operation is ☐ in substantial compliance with Standard of Practice 4.4
☐ not in compliance with

☐ in substantial compliance with
☐ not in compliance with
MINING OPERATIONS SUMMARY AUDIT REPORT

SUMMARY

Summarize the basis for this Finding/Deficiencies Identified:

Standard of Practice 4.5
Implement measures to protect fish and wildlife from direct and indirect discharges of cyanide process solutions to surface water.

☐ in full compliance with

☐ in substantial compliance with Standard of Practice 4.5

☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:

Standard of Practice 4.6
Implement measures designed to manage seepage from cyanide facilities to protect the beneficial uses of groundwater.

☐ in full compliance with

☐ in substantial compliance with Standard of Practice 4.6

☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:

Standard of Practice 4.7
Provide spill prevention or containment measures for process tanks and pipelines.

☐ in full compliance with

☐ in substantial compliance with Standard of Practice 4.7

☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:
Standard of Practice 4.8
Implement quality control/quality assurance procedures to confirm that cyanide facilities are constructed according to accepted engineering standards and specifications.

☐ in full compliance with
The operation is ☐ in substantial compliance with ☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:

Standard of Practice 4.9
Implement monitoring programs to evaluate the effects of cyanide use on wildlife, and surface and groundwater quality.

☐ in full compliance with
The operation is ☐ in substantial compliance with ☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:

Principle 5 | DECOMMISSIONING
Protect communities and the environment from cyanide through development and implementation of decommissioning plans for cyanide facilities.

Standard of Practice 5.1
Plan and implement procedures for effective decommissioning of cyanide facilities to protect human health, wildlife, livestock, and the environment.

☐ in full compliance with
The operation is ☐ in substantial compliance with ☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:
Standard of Practice 5.2

Establish a financial assurance mechanism capable of fully funding cyanide-related decommissioning activities.

☐ in full compliance with

☐ in substantial compliance with Standard of Practice 5.2

☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:

Principle 6 | WORKER SAFETY

Protect workers’ health and safety from exposure to cyanide.

Standard of Practice 6.1

Identify potential cyanide exposure scenarios and take measures as necessary to eliminate, reduce and control them.

☐ in full compliance with

☐ in substantial compliance with Standard of Practice 6.1

☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:

Standard of Practice 6.2

Operate and monitor cyanide facilities to protect worker health and safety and periodically evaluate the effectiveness of health and safety measures.

☐ in full compliance with

☐ in substantial compliance with Standard of Practice 6.2

☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:
Standard of Practice 6.3
Develop and implement emergency response plans and procedures to respond to worker exposure to cyanide.

☐ in full compliance with
The operation is ☐ in substantial compliance with Standard of Practice 6.3
☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:

Principle 7 | EMERGENCY RESPONSE
Protect communities and the environment through the development of emergency response strategies and capabilities.

Standard of Practice 7.1
Prepare detailed emergency response plans for potential cyanide releases.

☐ in full compliance with
The operation is ☐ in substantial compliance with Standard of Practice 7.1
☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:

Standard of Practice 7.2
Involve site personnel and stakeholders in the planning process.

☐ in full compliance with
The operation is ☐ in substantial compliance with Standard of Practice 7.2
☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:
MINING OPERATIONS SUMMARY AUDIT REPORT

Standard of Practice 7.3
Designate appropriate personnel and commit necessary equipment and resources for emergency response.

☐ in full compliance with

☐ in substantial compliance with

☐ not in compliance with

The operation is

Standard of Practice 7.3

Summarize the basis for this Finding/Deficiencies Identified:

Standard of Practice 7.4
Develop procedures for internal and external emergency notification and reporting.

☐ in full compliance with

☐ in substantial compliance with

☐ not in compliance with

The operation is

Standard of Practice 7.4

Summarize the basis for this Finding/Deficiencies Identified:

Standard of Practice 7.5
Incorporate remediation measures and monitoring elements into response plans and account for the additional hazards of using cyanide treatment chemicals.

☐ in full compliance with

☐ in substantial compliance with

☐ not in compliance with

The operation is

Standard of Practice 7.5

Summarize the basis for this Finding/Deficiencies Identified:

Standard of Practice 7.6
Periodically evaluate response procedures and capabilities and revise them as needed.

The operation is

☐ in full compliance with

Standard of Practice 7.6

JUNE 2021
Principle 8 | TRAINING
Train workers and emergency response personnel to manage cyanide in a safe and environmentally protective manner.

Standard of Practice 8.1
Train workers to understand the hazards associated with cyanide use.

☐ in full compliance with  ☐ in substantial compliance with  ☐ not in compliance with

The operation is

Summarize the basis for this Finding/Deficiencies Identified:

Standard of Practice 8.2
Train appropriate personnel to operate the facility according to systems and procedures that protect human health, the community and the environment.

☐ in full compliance with  ☐ in substantial compliance with  ☐ not in compliance with

The operation is

Summarize the basis for this Finding/Deficiencies Identified:

Standard of Practice 8.3
Train appropriate workers and personnel to respond to worker exposures and environmental releases of cyanide.

The operation is

☐ in full compliance with

Summarize the basis for this Finding/Deficiencies Identified:
Principle 9 | DIALOGUE AND DISCLOSURE
Engage in public consultation and disclosure.

Standard of Practice 9.1
Promote dialogue with stakeholders regarding cyanide management and responsibly address identified concerns.

☐ in full compliance with
☐ in substantial compliance with
☐ not in compliance with

The operation is

☐ in full compliance with Standard of Practice 9.1
☐ in substantial compliance with
☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:

Standard of Practice 9.2
Make appropriate operational and environmental information regarding cyanide available to stakeholders.

☐ in full compliance with
☐ in substantial compliance with
☐ not in compliance with

The operation is

☐ in full compliance with Standard of Practice 9.2
☐ in substantial compliance with
☐ not in compliance with
