The International Cyanide Management Code (hereinafter “the Code”, “Code” or “the Cyanide Code”), this document, and other documents or information sources referenced at www.cyanidecode.org are believed to be reliable and were prepared in good faith from information reasonably available to the drafters. However, no guarantee is made as to the accuracy or completeness of any of these other documents or information sources. No guarantee is made in connection with the application of the Code, the additional documents available or the referenced materials to prevent hazards, accidents, incidents, or injury to employees and/or members of the public at any specific site where gold or silver is extracted from ore by the cyanidation process. Compliance with this Code is not intended to and does not replace, contravene or otherwise alter the requirements of any specific national, state or local governmental statutes, laws, regulations, ordinances, or other requirements regarding the matters included herein. Compliance with this Code is entirely voluntary and is neither intended nor does it create, establish, or recognize any legally enforceable obligations or rights on the part of its signatories, supporters or any other parties.
Introduction

This document provides the framework for the information that an auditor must include in the Summary Audit Report prepared for a Cyanide Code Certification Audit conducted for a cyanide production facility and serves as a general template for presenting the required information.

The International Cyanide Management Institute (“ICMI” or “the Institute”) reviews the Summary Audit Report to ensure that it accurately represents the results of the Detailed Audit Findings Report and includes sufficient information to demonstrate the basis for each finding. Once ICMI determines that all documentation required for the Cyanide Code Certification Audit is complete, it posts the Summary Audit Report on the Cyanide Code website.

Instructions

1) The basis for the finding and/or statement of deficiencies for each Standard of Practice should be summarized in the Summary Audit Report. The Summary Audit Report is intended to provide a summary of the information included in the Detailed Audit Findings Report prepared for the certification audit; and therefore, should include only information that is presented in the Detailed Audit Findings Report.

2) The name of the cyanide production facility, the Lead Auditor’s signature, and the submittal date of the final report must be included at the bottom of each page of the Summary Audit Report.

3) An operation that is found in substantial compliance must submit a Corrective Action Plan with the Summary Audit Report.

4) The Summary Audit Report, the Detailed Audit Findings Report, and any necessary Corrective Action Plan with all required signatures must be submitted in electronic format to ICMI within 90 days of completion of the site inspection portion of the audit. An electronic copy of a letter from the owner or authorized representative of the audited operation granting ICMI permission to post the Summary Audit Report and Corrective Action Plan (if one is necessary) on the Cyanide Code website must also be submitted, along with both an electronic copy and a hard copy of a completed Auditor Credentials Form. The Lead Auditor’s signature on the Auditor Credentials Form must be certified by notarization or equivalent. Electronic documents should be submitted to the Institute via email at:

   audits@cyanidecode.org

   The hard copy of the notarized Auditor Credentials Form should be sent to:

   International Cyanide Management Institute
   1400 I Street, NW, Suite 550
   Washington, DC 20005, USA

5) The Summary Audit Report should include a description of the operation, identifying the facilities included within the scope of the audit and any new facilities or facilities that
have undergone substantial changes since the previous audit (in the case of a recertification audit), and indicating key operational components such as cyanide form(s) produced, packaging and storage, and other site-specific operational features that provide context to the reader ahead of the audit findings. The description of the operation should include sufficient information to describe the scope and complexity of the cyanide production operation being audited.
Operation General Information

Name of Production Facility: ________________________________
Name of Facility Owner: __________________________________
Name of Facility Operator: _________________________________
Name of Responsible Manager: ______________________________
Address: ________________________________________________
State / Province: __________________________________________
Country: _________________________________________________
Telephone: _______________________________________________
Fax: _____________________________________________________
Email: ____________________________________________________

Operation Location Detail and Description

Provide a description of the cyanide production operation (see Item 5 in the Instructions, above).
Auditor’s Finding

This operation is

☐ in full compliance

☐ in substantial compliance *(see below)

☐ not in compliance

with the International Cyanide Management Code.

* The Corrective Action Plan to bring an operation found in substantial compliance into full compliance must be enclosed with this Summary Audit Report. The operation must bring the operation into compliance within one year from the date on which ICMI posts the operation’s Summary Audit Report on the Cyanide Code website.

Compliance Statement

The Summary Audit Report for a recertification audit must include one additional statement that is not required in the Summary Audit Report for an initial certification audit. For an operation found in full compliance with the Code, the report must indicate whether the operation had any compliance issues or significant cyanide incidents since its previous certification and identify where in the report such information can be found. For a production facility found in substantial compliance or non-compliance, the report must identify the Standard(s) of Practice on which the finding was based.

One of the following two statements must be included directly following the overall compliance finding for an operation found in full compliance during a recertification audit:

“This operation has not experienced any compliance issues or significant cyanide incidents during the previous three-year audit cycle.”

or

“This operation has experienced compliance issues or significant cyanide incidents during the previous three-year audit cycle which are discussed in this report under the following Standard(s) of Practice:”

The following statement should be included directly following the overall compliance finding for an operation found in substantial compliance during a recertification audit:

______________________________________________________________________________________

The following statement should be included directly following the overall compliance finding for an operation found in substantial compliance during a recertification audit:
“This operation was found in substantial compliance with the Cyanide Code based on the audit findings discussed in this report under the following Standard(s) of Practice:”

The following statement should be included directly following the overall compliance finding for an operation found in non-compliance during a recertification audit:

“This operation was found in non-compliance with the Cyanide Code based on the audit findings discussed in this report under the following Standard(s) of Practice:”

Signature 

Dates of Audit: 

Auditor Attestation

I attest that I meet the criteria for knowledge, experience and conflict of interest for a Cyanide Code Certification Audit Lead Auditor, established by the International Cyanide Management Institute and that all members of the audit team meet the applicable criteria established by the International Cyanide Management Institute for Cyanide Code Auditors.

I attest that this Summary Audit Report accurately describes the findings of the certification audit. I further attest that the certification audit was conducted in a professional manner in accordance with the International Cyanide Management Code Cyanide Production Verification Protocol and using standard and accepted practices for health, safety and environmental audits.

Principles and Standards of Practice

Principle 1 | OPERATIONS
Design, construct and operate cyanide production facilities to prevent release of cyanide.

Standard of Practice 1.1
Design and construct cyanide production facilities consistent with sound, accepted engineering practices and quality control/quality assurance procedures.

☐ in full compliance with
☐ in substantial compliance with
☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:

Standard of Practice 1.2
Develop and implement plans and procedures to operate cyanide production facilities in a manner that prevents accidental releases.

☐ in full compliance with
☐ in substantial compliance with
☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:

Standard of Practice 1.3
Inspect cyanide production facilities to ensure their integrity and prevent accidental releases.

☐ in full compliance with
☐ in substantial compliance with
☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:
Principle 2 | WORKER SAFETY
Protect workers’ health and safety from exposure to cyanide.

Standard of Practice 2.1
Develop and implement procedures to protect facility personnel from exposure to cyanide.

☐ in full compliance with

The operation is ☐ in substantial compliance with  ☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:

Standard of Practice 2.2
Develop and implement plans and procedures for rapid and effective response to cyanide exposure.

☐ in full compliance with

The operation is ☐ in substantial compliance with  ☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:

Principle 3 | MONITORING
Ensure that process controls are protective of the environment.

Standard of Practice 3.1
Conduct environmental monitoring to confirm that planned or unplanned releases of cyanide do not result in adverse impacts.

☐ in full compliance with

The operation is ☐ in substantial compliance with  ☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:
Principle 4 | TRAINING
Train workers and emergency response personnel to manage cyanide in a safe and environmentally protective manner.

Standard of Practice 4.1
Train employees to operate the facility in a manner that minimizes the potential for cyanide exposures and releases.

☐ in full compliance with

☐ in substantial compliance with Standard of Practice 4.1

☐ not in compliance with

The operation is

Summarize the basis for this Finding/Deficiencies Identified:

Standard of Practice 4.2
Train employees to respond to cyanide exposures and releases.

☐ in full compliance with

☐ in substantial compliance with Standard of Practice 4.2

☐ not in compliance with

The operation is

Summarize the basis for this Finding/Deficiencies Identified:

Principle 5 | EMERGENCY RESPONSE
Protect communities and the environment through the development of emergency response strategies and capabilities.

Standard of Practice 5.1
Prepare detailed emergency response plans for potential cyanide releases.

☐ in full compliance with

☐ in substantial compliance with Standard of Practice 5.1

☐ not in compliance with

The operation is
Summarize the basis for this Finding/Deficiencies Identified:

**Standard of Practice 5.2**
*Involve site personnel and stakeholders in the planning process.*

☐ in full compliance with

☐ in substantial compliance with Standard of Practice 5.2

☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:

**Standard of Practice 5.3**
*Designate appropriate personnel and commit necessary equipment and resources for emergency response.*

☐ in full compliance with

☐ in substantial compliance with Standard of Practice 5.3

☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:

**Standard of Practice 5.4**
*Develop procedures for internal and external emergency notification and reporting.*

☐ in full compliance with

☐ in substantial compliance with Standard of Practice 5.4

☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:
Standard of Practice 5.5
Incorporate remediation measures and monitoring elements into response plans and account for the additional hazards of using cyanide treatment chemicals.

☐ in full compliance with

The operation is ☐ in substantial compliance with Standard of Practice 5.5
☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:

Standard of Practice 5.6
Periodically evaluate response procedures and capabilities and revise them as needed.

☐ in full compliance with

The operation is ☐ in substantial compliance with Standard of Practice 5.6
☐ not in compliance with

Summarize the basis for this Finding/Deficiencies Identified:
